

Congratulations!

You have earned this badge!

Badge Name: Inquiry through Chemistry Investigations

Organization: Baxter Academy

Badge Description: Students are invited to apply methods of scientific inquiry to explore chemistry concepts. The focus is on developing questions that can be resolved by data collection, quantitatively analyzing the data, and effectively sharing the results.

Badge Criteria: Students will present their data and conclusions to the other student researchers, and defend their results. Some summary data and conclusions will be digitally shared using Google drive as well. Work is assessed according to a specific and detailed rubric that includes both peer and instructor evaluation.
